Ventilation Facility construction update – Homebush

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

The M4 East will extend the existing M4 from Homebush to Haberfield via underground twin tunnels, each 5.5 kilometres in length and among the widest in the southern hemisphere. They will allow for three lanes of traffic in each direction, saving travel time for motorists and taking traffic off local roads. For more information, visit westconnex.com.au/M4East.

The project requires the construction of a number of permanent buildings to support the operation of the motorway, including a ventilation facility on Underwood Road. This facility will be located on the western side of Underwood Road, within the current construction footprint. A map of the site layout and future design is provided overleaf.

The facility will consist of two structures; a low horizontal building containing the distribution substation and a vertical ventilation shaft. The vertical element will contain the attenuators used to reduce noise, dampers used to regulate air flow, five fans and an internal stair to allow access for regular air quality monitoring and maintenance. The fans are located directly above the westbound exit carriageway, improving operational efficiency. A planted courtyard and vehicle circulation area will be situated in front of these structures, setting them back from Underwood Road and Short Street East.

On **Tuesday, 1 August 2017**, a crane will be delivered and installed in order to allow for the continued construction of the ventilation facility. Delivery of the crane will occur from 6.00 am with unloading and assembly to follow within standard construction hours. The crane is anticipated to be in place for 11 months, until the completion of the Underwood Road ventilation facility. Work on the facility will be undertaken **between the standard construction hours of 7.00 am and 6.00 pm Monday to Friday and 8.00 am and 1.00 pm Saturday**.

There may be some noise associated with this work, however every effort will be made to minimise the impact of work, including turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.

Notification reference: N234

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
