

Wattle Street Traffic Switch 2A-1, Haberfield

Work is underway on WestConnex which involves widening and extending the M4 and M5 and joining them to create a free-flowing motorway network.

The New M4 will extend the existing M4 from Homebush to Haberfield via underground twin tunnels, each 5.5 kilometres in length and among the widest in the southern hemisphere. They will allow for three lanes of traffic in each direction, saving travel time for motorists and taking traffic off local roads. For more information, visit westconnex.com.au/M4East.

From **Tuesday 15 August 2017**, work to realign Wattle Street between Martin Street and Waratah Street will commence. This is the first stage of the 2A traffic switch, which involves building a new section of road and shifting traffic slightly to the north (towards Reg Coady Reserve). The second stage (2A-2) will occur later in the year. A map showing the changed traffic conditions and work area is provided overleaf.

Once the work is completed, motorists travelling along Wattle Street between Martin Street and Waratah Street will be shifted onto the new section of road.

Work to build the new section of road is expected to take **up to ten night shifts to complete**, weather permitting. To reduce impacts on road users and ensure the safety of workers and motorists, work within the road will occur between **9.00 pm and 5.00 am Sunday to Friday**. Please note, if the work is unable to be completed during this period, work will be rescheduled and additional community notification will be provided.

The work will involve:

- establishing traffic control and setting up temporary work sites
- reconfiguring crash cushions and concrete barriers
- placement of asphalt
- temporary line marking
- installation of temporary directional signage.

Equipment used will include millers, excavators, compactor plates, trucks, hand tools and lighting equipment.

Traffic control and pedestrian management will be in place to ensure the safety of motorists, residents and workers. Please allow extra travel time and follow the direction of traffic controllers and/or signage.

There will be some noise and vibration associated with this work, however every effort will be made to minimise the impact of work, including by using non-tonal reversing beepers on all machinery, turning off equipment and vehicles when not in use and, where possible, directing noisy equipment away from residences.

In an effort to minimise additional impacts experienced as a result of unexpected construction delays, we can provide residents with weekly email updates about upcoming out-of-hours work in the area. If you would like to receive updates about out-of-hours work near your property, please email our team at info@m4east.com.au and ask to subscribe to the out-of-hours work mailing list.

Notification reference: N238

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
