

New M4 permanent noise wall construction – Wattle Street, Haberfield

From **Thursday, 28 September 2017** work will commence to construct the permanent noise wall along Wattle Street, Haberfield, which will run along the back of the even-numbered properties on Walker Avenue. A map highlighting the location of the structures is provided overleaf.

Timing and work hours

Work has been scheduled to take place between **7.00 am and 6.00 pm Monday to Friday and 8.00 am and 1.00 pm on Saturday**.

The noise wall is scheduled to be constructed in stages. The noise wall between 24 Walker Avenue and Allum Street will be installed first, with the remaining structure between Allum Street and Ramsay Street to follow afterwards. You will be notified separately prior to the commencement of each new section.

The permanent noise wall is expected to be completed by the end of 2017.

Work activities include:

- removal of the temporary ply wood noise wall along the back of the properties
- augur piling (a quieter form of piling) for the installation of the support posts
- placing the concrete hebel panels
- constructing drainage on the northern side of the noise wall (Wattle Street side)
- painting the noise wall structure.

Equipment used for this work will include an excavator with an augur piling attachment, a mobile crane and hand tools.

Minimising impact

There will be some noise and vibration associated with this work during standard construction hours. Every effort will be made to minimise the impact of work, including staging of work, turning off equipment and vehicles when not in use, and directing noisy equipment away from residences wherever possible.

If you have an enquiry or complaint about this work, please contact toll free 1800 660 248 and ask to speak to a member of the M4 East team or email info@M4East.com.au.

Notification reference: N251

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
