

Blasting and tunnelling activities at Arncliffe site

Blasting will take place in the vicinity underneath the Cooks River, Tempe from **18 December 2017** and will continue into 2018. Two daily blasts are permitted **Mondays – Fridays 7am to 6pm** and on **Saturdays 8am to 1pm**. We will endeavour to complete any blasts during mornings, and there will be days where this may not be possible. No blasts will take place on public holidays or Sundays.

Blasting is a common tunnelling technique which will continue to be used in conjunction with roadheader excavation. Tunnelling via roadheader excavation will continue 24/7. Residents may hear a thunder like noise and windows and doors may rattle. Vibrations may also be felt for up to 10 seconds, at times the vibrations may be felt more keenly on some days than on other days.

This activity has been modelled by experts in the field of blasting and vibration and are monitored daily. All underground blasting activities will be carried out in accordance with strict vibration requirements set out in the 'New M5 Instrument of Approval'.

Tunnelling works for the mainline tunnels and cross passage tunnels will be carried out approximately 71 meters underground in this area. Cross passage tunnels which connect eastbound to westbound tunnels are designed to house electrical equipment for the tunnel operation and to permit the motoring public to cross to the other carriageway in the event of an emergency.

In order to see the New M5 tunnel alignment in comparison to the location of your property please go to <https://gis.aecomonline.net/westconnex/newm5/>.

If you would like further information or would like to discuss the location of the site compound, please call 1800 660 248 and ask to speak to a member of the New M5 community engagement team or email info@newm5.com.au.

We apologise for any inconvenience this work may cause.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
