

## Night work to install gas monitoring wells at St Peters Interchange

Night work is required to install gas monitoring wells at the St Peters Interchange. This will be undertaken over a period of three weeks from 27 August to 1 September; 3 September to 8 September, and 10 September to 15 September 2018 from 6pm to 6am and Saturday 7am to 6pm (weather permitting).

### What we're doing

Drilling, using a piling rig will be undertaken for the installation of gas monitoring wells in the St Peters Interchange site.

This work needs to be undertaken outside of construction hours for the safety of workers. A map showing the locations of the drilling is provided overleaf.

Equipment used will include a piling rig, trucks, light vehicles, excavator, generator and lighting towers.

### How this affects you

This work should have no noise impact to you but you may notice some movement and lighting within the site. We will however minimise any impact by placing noise blankets around the machinery in use and facing the lighting towers away from any residential properties.

If you have a question about this work, please call 1800 660 248 (toll free) and ask to speak with a member of the New M5 community engagement team or email [info@newm5.com.au](mailto:info@newm5.com.au)

### When

27 August to 1 September 2018;  
3 September to 8 September 2018;  
10 September to 15 September 2018.

### Hours of operation

Monday to Friday 6pm to 6am;  
Saturday 7am to 6pm

### Where

St Peters Interchange
