

## Day time piling work within the St Peters Interchange construction site

Piling work is needed within the St Peters Interchange construction site on Saturday 24 November 2018 from 8am to 5pm.

### What we're doing

The piling work involves driving large concrete or steel beams into the ground to about 40 metres below the surface. We will use a piling rig and light vehicles to complete this work.

### How this affects you

This work may be noisy. You may hear a clanging noise and feel some vibration around the work site. Piling is a common technique used in urban areas and there is no immediate cause for concern. Noise monitoring will be undertaken during the work to ensure noise levels do not exceed limits.

Some of this piling work is required out of standard construction hours for the safety of workers from 1pm to 5pm.

If you have a question about this work, please call 1800 660 248 (toll free) and ask to speak to a member of the New M5 community engagement team or email [info@newm5.com.au](mailto:info@newm5.com.au).

We apologise for any inconvenience this may cause.

### When

Saturday 24 November 2018

### Hours of operation

Saturday 8am to 5pm

### Where

St Peters Interchange
