

Night work and traffic changes on Princes Highway near the May Street intersection St Peters

Night work will continue to install new utility service conduits across the full width of Princes Highway near the intersection of May Street on Monday 17 December and Wednesday 19 December from 7pm to 5am.

What we're doing

Work to install new communications and ITS (intelligent transport system) conduits across the full width of Princes Highway is taking longer than originally scheduled. This is due to the presence of congested utility services under the road surface resulting in confined working conditions, and restricted traffic approvals to close lanes on Princes Highway reducing the amount of time available to complete each shift and reinstate the road for traffic each morning. Work in this location will continue on the following nights:

- **Monday 17 December from 7pm to 5am**
Traffic changes will be in place from 11pm to 5am
- **Wednesday 19 December from 7pm to 5am**
Traffic changes in place from 11pm to 5am

We anticipate additional night work shifts will be required in the new year to complete conduit installation across the full width of Princes Highway. Local residents will be notified when further work in this location has been scheduled.

Traffic changes Mon 17 Dec and Wed 19 Dec from 11pm to 5am

- Multiple lane closures will be in place on Princes Highway between May Street and Barwon Park Road; two-way traffic on Princes Highway will be maintained at all times
- All existing turning movements at the intersection of Princes Highway and May Street will be maintained under the direction of traffic control
- Pedestrians will be assisted around the work area by traffic control

Due to the necessary safety and traffic approvals required for multiple lane closures on Princes Highway, this work must take place at night outside of peak volume times. Please expect delays in the area.

When

Monday 17 December
Wednesday 19 December

Hours of operation

7pm to 5am
Traffic changes in place from
11pm to 5am

BUILDING OUR FUTURE

Constructed by

How this affects you

Equipment used during this work will include excavators, vacuums trucks, road saw, rock breaker, hand tools, construction trucks, light vehicles, compaction equipment, lighting towers and traffic control.

The work is expected to generate high noise. Every effort will be made to minimise noise and light spill associated by this work by turning off equipment and vehicles when not in use and directing noise and light generating equipment away from residents properties where possible.

The site compounds on May Street and along the southern side of Campbell Street will be used intermittently throughout the work for storage of materials and vehicle parking.
