Update – Traffic changes and night work on Campbell Street, St Peters

Further to our previous notifications, work is currently underway to clear vacant properties within the project footprint. To facilitate this work, changed traffic conditions are currently in place on Campbell Street and the Princes Highway.

Extension to traffic changes

Due to delays in completing overhead power relocation work to allow the safe clearing of some properties, the traffic changes are now expected to be in place until **late February**. We thank you for your ongoing patience while we complete this work.

The changed traffic conditions include:

- closure and detour of Campbell Street between Unwins Bridge Road and Barwon Park Road. Refer to Map A provided overleaf.
- reduced speed limits
- footpath closures and detours.

Traffic control and signage are in place to assist local residents, road users, pedestrians and cyclists navigate through the changes. Access to streets and properties will continue to be maintained under traffic control.

Upcoming night work

Night work will be required to move the concrete safety barriers currently in place along Campbell Street and the Princes Highway and to facilitate ongoing power adjustment work.

During the night work, a full closure is required on Campbell Street in both directions between Unwins Bridge Road and Barwon Park Road. Refer to Map B provided overleaf. This work is required to be carried out at night to avoid impacts to traffic during the day.

Up to **eight shifts** of night work will be carried out intermittently until late February. Work hours are between **7pm and 5am, Monday to Saturday**. Equipment used during the work will include trucks, lighting towers, crane trucks, light vehicles and hand tools.

A reminder that Ausgrid are currently doing work on Euston Road till the end of March (unrelated to WestConnex). This will result in Euston Road being one way (southbound only).

Minimising community impact

Every effort will be made to minimise impacts associated with this work by:

- scheduling noisy work to take place early in the night where possible
- turning off equipment and vehicles when not in use and using non-tonal reversing beepers
- directing noise generating equipment and lights away from residential properties.

If you have a question about this work, please call **1800 660 248** and ask to speak to a member of the New M5 community engagement team or email info@newm5.com.au.
