

Trial underground blasting in Kingsgrove construction compound

Trial underground blasting will be conducted within the tunnel cross passage beneath Commercial Road, Kingsgrove. This testing will assess blast vibrations before adopting the approved method to excavate the New M5 tunnels.

We plan to conduct eight intermittent trial blasts on **Monday afternoon, 20 November 2017 within a 1 hour period.**

Blasting is a safe and commonly used method of road tunnel excavation. You should not hear any noise from the trial. You may feel a series of small vibrations. A vibration monitoring system will be set up near the compound to measure vibration at nearby properties.

The trial blasting will be around 15 - 20 meters underground and will be conducted by licensed experts. Every effort will be made to minimise impacts on local businesses and residents. All blasting activities will be within the strict vibration requirements set out in the New M5 Conditions of Approval.

This work is part of the New M5 project which will duplicate the existing M5 tunnel and more than double traffic capacity of the M5 East corridor. For more information, visit westconnex.com.au/NewM5.

If you have any questions about this work, please call toll-free **1800 660 248 (24 hours)** and ask to speak to a member of the New M5 community engagement team or email info@newm5.com.au.

ABOUT WESTCONNEX

WestConnex is part of a broader transport plan for Sydney which includes improved public transport, such as Sydney Metro and light rail, as well as better, more reliable motorway solutions. More than two-thirds of WestConnex will be built underground. Once complete, motorists will be able to avoid up to 52 sets of traffic lights and enjoy significant travel time savings.
