

## Day and night work at Campbell Road, Alexandria

Work has recently been completed to install a new water main the length of Euston Road from Campbell Road to Maddox Street, in order to make improvements to the Sydney Water network. **The next step is commissioning the new water service.** As this work needs to occur in conjunction with a planned Sydney Water outage, it is being scheduled to occur at night to minimise impact to water users.

### What we're doing

Commissioning works will take place at a service pit located on Campbell Road just south of Harber Street. Day work before and after the night shift will be required to prepare and backfill the area. The schedule for this work is as follows:

- Thursday 14 June day work - preparation work (7am to 6pm)
- Friday 15 June day work - preparation work (7am to 6pm)
- **Monday 18 June night work** - commissioning work (9pm to 6am)
- Tuesday 19 June day work - backfilling work (7am to 6pm)

All work is weather permitting and is scheduled in accordance with Sydney Water requirements. A map showing the location of work and traffic changes in place during the work, is provided overleaf.

The work will involve the removal of asphalt, excavation of ground, cutting existing Sydney Water assets, making a connection to the newly installed main, and backfilling the ground.

### Traffic changes

All work will take place in the eastbound traffic and parking lane on Campbell Road. **A stop/ slow traffic arrangement will be in place on Campbell Road around the work area for the duration of the day and night work.**

Traffic control, signage and reduced speed limits will be in place to assist local residents and road users to navigate around the closure.

### When

Thursday 14 June - Tuesday 19 June

### Hours of operation

7am and 6pm (day work)  
9pm and 6am (night work)

## Minimising impact on residents

The work is expected to create noise. Every effort will be made to further minimise noise and light spill associated with this work by:

- Scheduling noisy work to take place early in the night where possible
- Installing noise blankets around the work site
- Turning off equipment and vehicles when not in use
- Using non-tonal reversing beepers on all machinery
- Directing noise generating equipment and lights away from residential properties where possible.

Equipment used during the work will include lighting towers, hand tools, vacuum truck, excavator, bucket trucks, saw cutter, generators, traffic management and construction vehicles.
